- Optimization
- IFRS17
- SolvencyII

Programming and Pricing tools

- Python
- R
- SQL
- SAS
- git
- Emblem
- Classifier
- Radar
- PowerBI
- Docker

About Me

An experienced professional with a solid foundation in actuarial methods and data science techniques including machine learning. With over 5 years of project management experience, I have successfully delivered various projects across retail and commercial segments for both motor and non-motor lines of business while managing mixed teams of actuaries and data scientists as well as actuarial and non-actuarial stakeholders. I believe in combining actuarial and data science best practices and deliver greater value with each project by automating repetitive tasks and enabling actuaries to spend more time on improving models and generating meaningful and actionable insights.

Work Experience

- Oct 2018 – Present** **Senior Actuary and Product Owner** **Axa (Cologne, Germany)**
 - Project planning and organisation including review meetings with different stakeholders to ensure expectations are met and any change in requirements are integrated in project requirements asap.
 - Mentoring and hands-on development with other team members.
 - Key projects:
 - Transformation project for P&C pricing to move from legacy systems (SAS, Excel, Emblem) to cloud using SQL and Python (including Python and git training for actuarial teams).
 - Pricing models for different business lines (SAS, Emblem)
 - Profitability and leakage analysis tool (SQL, Python)
 - Data pipeline for pricing projects (AWS, SQL, Python)
 - IFRS17 data prep tool for reinsurance & reserving teams
- Apr 2018 – Sep 2018** **Senior Consultant** **Deloitte (Cologne, Germany)**
 - Development of an initial P&C pricing offering in Germany.
 - Automated tool to read reserving triangle data and output in tabular form and vice versa in R.
 - Defining IFRS17 test cases in SAS for product testing.
- Apr 2016 – Mar 2018** **Senior Actuary and Data Scientist** **Generali (Munich, Germany)**
 - Project lead for motor and non-motor price modelling projects.
 - Training and mentoring team members on efficient modelling with Emblem, Classifier, Radar, SAS and R.
 - Key projects:
 - Development of company's first telematics motor insurance.
 - Peril based pricing models for motor and household businesses.
 - Monthly automated profitability and leakage reports in Radar.
 - Underwriting control models for SME liability business.
- Sep 2013 – Apr 2016** **Actuary and Project Manager, Global P&C** **Generali (Trieste, Italy)**
 - Identifying and managing pricing and analytics projects in Italy, Germany, Netherlands, Belgium and Czech Republic.
 - Developing P&C pricing best practices and guidelines.
 - Training local actuaries on technical pricing using SAS, Emblem, Classifier and Radar etc.
- Feb 2007 – Jun 2009** **Market Research and Business Development** **Evalueserve (Gurgaon, India)**
 - Managing and conducting market research, analytics and business development projects.
