- IFRS17
- SolvencyII

Programming and Pricing tools

- Python
- R
- SQL
- SAS
- git
- Emblem
- Classifier
- Radar
- PowerBI
- Docker

About Me

An experienced professional with a solid foundation in actuarial methods and data science techniques including machine learning. With over 5 years of project management experience, I have successfully delivered various projects across retail and commercial segments for both motor and non-motor lines of business while managing mixed teams of actuaries and data scientists as well as actuarial and non-actuarial stakeholders. I believe in combining actuarial and data science best practices and deliver greater value with each project by automating repetitive tasks and enabling actuaries to spend more time on improving models and generating meaningful and actionable insights.

Work Experience

- Oct 2018 – Present** **Senior Actuary and Product Owner** **Axa (Cologne, Germany)**
 - Project manager and technical lead.
 - Mentoring junior team members.
 - Key projects:
 - Transformation projects to move from SAS, Emblem to AWS, Python to implement ML models for P&C pricing and analytics
 - Python and git training for actuarial teams
 - Pricing models for different business lines
 - Profitability and leakage analysis tool
 - Data pipeline for pricing projects
